

SARPI NETWORK SERVICES

INTERNATIONAL HAZARDOUS WASTE MANAGEMENT

Tailor made services include:

1. **Packaging:** delivery of packaging services and materials compliant with worldwide road and sea transport regulations.
2. **Conditioning:** repacking of hazardous substances using highly qualified chemists, supervisors and trained operators.
3. **Transport:** organisation of Transfrontier shipping of hazardous waste to suitable disposal facilities.
4. **Regulatory administration:** coordination of the administrative work to comply with the different regulations (Transfrontier Shipment documents, International Transport of Wastes, Customs).

Veolia ES Field Services (VFS)

Veolia ES Field Services (VFS) is part of the SARPI-Veolia network delivering international recovery and disposal services and is a key player in the onsite management of hazardous waste. Operating for more than 20 years with over a hundred references, involving complex operations in challenging working environments around the globe.

Types of waste commonly encountered:

Pesticides
PCBs
Contaminated soils
Asbestos

Halon gas
Hazardous industrial products
Pharmaceutical waste products
Chemical waste

VFS will:

Complete transfrontier shipment documentation
Train and work with local contractors

Organise transfrontier waste shipment
Use its network of facilities to dispose of waste in the most cost-effective way.

Phase 6 : Transport and ultimate disposal of materials

- VFS has long-term relationships with expert transport companies.
- VFS controls safety & regulation compliance on the entire journey:
 - Sea container loading control.
 - Assessment of the safest route.
 - Escort vehicles. Speed limitation.
 - Vehicle spillage equipment.

Phase 7 : Final Report

- A summary of the project is forwarded to customers upon completion along

Phase 5 : Repackaging and container loading for export

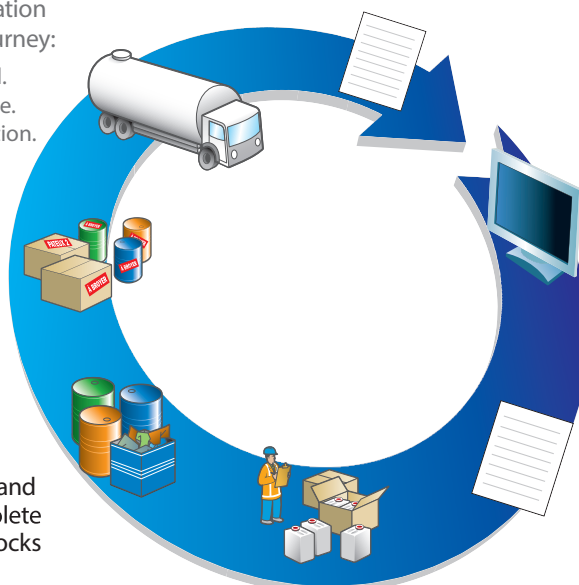

Phase 4 : Centralisation and verification of all obsolete stocks

Phase 3 : Mobilisation of equipment and in-country training

Phase 2 : Development of an Environmental Management Plan

Phase 1 : Contract Agreement and TFS application

- Global TFS management on behalf of waste producer.
- Documentation management including Dangerous Goods Notes
